

RG3

CASE STUDY: THE SANTALUZ CLUB – SAN DIEGO, CA

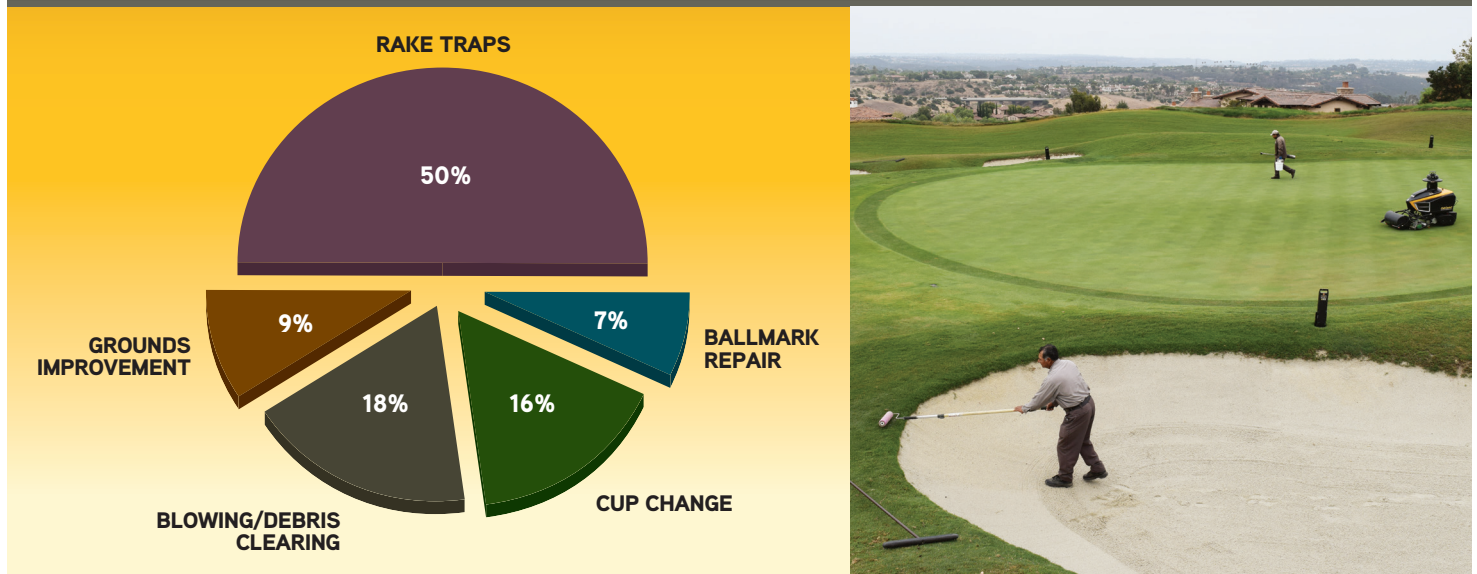

INCREASED EFFICIENCIES LEAD TO GREATER PRODUCTIVITY AT THE SANTALUZ CLUB

After realizing the value of their first RG3 in July of 2016, The Santaluz Club in San Diego incorporated 4 additional RG3's into their daily operation. The efficiencies gained from the additional RG3s affords Superintendent Jeff Miller the flexibility to schedule his crew to complete the type of detail work that is taking his club to the next level.

RG3 PRODUCTIVITY IMPACT

The RG3 has enabled The Santaluz Club to increase their labor productivity during first assignments and course preparation work. One crew member equipped with an RG3 is able to perform the same tasks that previously required three people and multiple pieces of equipment. RG3 operators repair ball marks, change the cup, rake greens side bunkers, and perform other grounds improvement activities like pulling weeds and trimming irrigation heads.

HOW RG3 OPERATORS UTILIZE THEIR TIME DURING RG3 MOWING AT THE SANTALUZ CLUB

“The RG3 has enabled us to improve our overall productivity, allowing the crew to focus more attention to the extra detail work that will take us from good to great.” – Jeff Miller, Superintendent, The Santaluz Club
